THE following is a list of Head Stations only, and not of runs that are comprised in the Stations. The publishers have been to much trouble to collect from various sources the information herein contained, there being no official list obtainable. Doubtless there are still many omissions, and in a few cases the names of the owners may not be the present owners; but if the gentlemen interested will kindly communicate with the publishers, all mistakes shall be rectified in the next issue. A list of Stations in the Unsettled Districts will be found further on.

In this list the Station stands first, then the District, then the nearest Post-office, and lastly, the names of Owners.

# Getting around this CD

## Navigating Archive CD Books CDs

---

All Archive CD Books products can be navigated easily using the handy bookmarks on each CD. The table of contents in most original books, and the original book index where it exists, can provide additional ways of finding the information required.

## Searching Text on Archive CD Books Australia CDs

---

Optical Character Recognition (OCR) technology has been developing over the years as a useful mechanism to convert images (as Archive CD Books pages are) into text which can be searched. The quality of the OCR can still vary, and hence the searchability can vary. Around 95% or 99% of the words in books with good type are searchable—or even higher with very good type.

*OCR is now a wonderful searching aid in many instances  
but there is still no substitute for reading the book!*

## Different Versions of Adobe Acrobat Reader

---

Adobe Acrobat Reader 4 or later should be used. Adobe Reader 6 (as it is now named) in fact has considerably better searching options and is recommended.

- **Acrobat Reader v4** has both a “Find” and a “Search” tool. Those tools are two *\*totally\** different things. Our CDs (that are searchable) work with the *\*FIND\** tool
- **Acrobat Reader v5** has only a “Find” tool (not a “search” tool). Our CDs (that are searchable) work with the *\*FIND\** tool.
- **Adobe Reader v6** has only a “Search” tool (not a tool labelled “Find”). HOWEVER — what is called “Search” is the same as the tool that used to be called “Find” Our CDs (that are searchable) work with the *\*SEARCH\** tool

## Tips For Searching and Getting More From the CD Books

---

- update to Adobe Reader 6 for more versatile searching options, including the ability to bring up a list of all instances of the word you are searching for — across multiple files on a single CD in a single search request.
- enter the **MINIMUM** number of characters needed to bring up the search results required.
- use Adobe Reader 6 to do some trial searches to try to identify the characters that may be misread. These can show up in the extra text in the search results list (Adobe 6 only). A few minutes trial will help you to avoid using characters that are more prone to being misread, e.g. try entering “rederi” if you want “Frederick”, but find that the letters “F” “c” and “k” are sometimes misread.
- use the “Match whole word” option to eliminate unnecessary items in your results list, e.g. to eliminate all the blacksmiths and tinsmiths etc when you only want the name Smith.
- use the “Match case” option to eliminate all the occupations “smith” if you only want the name “Smith”.
- don’t just search for names. Search the book for other names, places and subjects of interest:
  - › look for others of the same name
  - › look for others who lived in the same place or street
  - › who was the postmaster or police officer in the town?
  - › how often and at what time did the coach arrive in town?
  - › what churches were there and what time were services held?
  - › what other activities were there in the community?
  - › look for others who had the same occupation or other interests
- all of this and more may be available in a seemingly mundane book such as a directory. You can learn much of the background of life at the time, even if your ancestor is not listed there.
- Many CDs have only one file, but some have the book content spread over several files. Adobe Reader normally searches in the file that is open at the time. If you wish to search ALL files at once choose the “All PDF documents in” option and select the CD drive or directory the files are in—Adobe Reader 6 only.

ADOBE ACROBAT SEARCHING IS A WONDERFUL FIRST FINDING AID.  
BUT DO NOT RELY ON IT TO PICK UP ALL THE INFORMATION YOU WANT
